

Adaptive Release

1. Adaptive release allows you to specify who has access to specific items in the content portion of your course.
2. To access Adaptive Release, click on the drop down arrow next to the item in your content area and click on Adaptive Release.

3. Once you are in there, you can select the Usernames from the browse option that you want to add to this specific item.

2. Membership

The membership for this item is controlled by the groups set in the Item Properties.

Username

*Enter one or more Username values or click **Browse** to Search. Separate multiple Username values with commas.*

Course Groups

4. When you pull up the browse option, select the box next to the names to add and click submit.

The screenshot shows the 'Course Membership' interface. At the top, there is a search bar with the following fields: 'Field' (set to 'Username'), 'String' (set to 'Contains'), 'Term' (empty), and a 'Go' button. Below the search bar is a table with the following columns: 'First Name', 'Last Name', 'Username', and 'Role'. The table contains 7 rows of user data. The first row is highlighted in yellow, and its checkbox is checked. At the bottom right of the table, there are buttons for 'Cancel' and 'Submit' (highlighted in green). Below the table, there is a pagination control showing 'Displaying 1 to 7 of 7 items', a 'Show All' button, and an 'Edit Paging...' button.

<input type="checkbox"/>	First Name	Last Name	Username	Role
<input checked="" type="checkbox"/>	Justin (Test Student)	Frisque	jfrisque_s	Student
<input type="checkbox"/>	Justin	Frisque	jfrisque	Student
<input type="checkbox"/>	Justin	Frisque	jfrisqueadmin	Instructor
<input type="checkbox"/>	Justin (Test Student)	Frisque	jfrisqueadmin_s	Student
<input type="checkbox"/>	Susan	Gallanis	sgallanis	Student
<input type="checkbox"/>	Jonathan	Mumme	jmumme	Student
<input type="checkbox"/>	Elizabeth	Evans	eevans	Student

5. When you are all done selecting the names and clicked submit, make sure to click submit one more time when you are back to the Adaptive Release main page.

* If you have multiple items for the same set of students to view, you will want to create a folder that you put all the content in. Then you can just set the adaptive release to the folder and everything inside of it will be for the specific set of students. (It saves you time from doing the adaptive release on every item)

** You may notice that there are "Groups" in Blackboard but those are not the same as creating "Teams" in ANGEL. Groups in Blackboard are given their own workspace area for collaboration.
